

GigaCore
ETHERNET SWITCHES

Release notes.

Version 1.4.1

Related products: GigaCore 10t

Release notes GigaCore 1.4.1

This release supports new models, more specifically GigaCore 10t.

New Features

- No new features are introduced in this release.

New Model Support

- Support for GigaCore 10t in this Firmware version ensures this new model can seamlessly be integrated in networks with other GigaCore switches.
- Upgrading all GigaCores to this version ensures consistency in the GigaCore network and that Araneo's Health Check indication reflects this consistent status as well.
